Part 2

My favorite subject in high school is math because I think it is really interesting. I also liked it in elementary school. I enjoy thinking about different problems and using logic to answer them step by step. This makes me feel satisfied with myself. In my math classes, I usually work with my classmates. This is great because we help each other. I have made many friends by helping others. I also get very high scores in math classes.

I know math will help me a lot in my future. I really want to be an accountant, so I need to study hard to get a good job. Being good with numbers is useful for so many things, like looking after money, understanding statistics, and figuring out how much tax to pay. I think math will always be important, so I want to use my knowledge to teach my children.
